The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director Division of Water Room W264 402 West Washington Street Indianapolis, Indiana 46204

For a petition to be considered valid it must:

- 1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
- 2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
- 3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
- 4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water Room W264 402 West Washington Street Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Application # : DR-395

Lake : Twin Lakes

Applicant : North Twin Lake Association

Floyd Yoder, President 1790 West 635 North Howe, IN 46746-9716

Description : A portion of an existing 10' wide, 210' long channel between North and South

Twin Lakes will be restored to its original condition to improve navigability. An area approximately 2' deep and 4' wide of accumulated muck and debris will be removed. The dredging will be limited to the centerline of the channel to avoid potential erosion problems. Also, an abandoned dam base will be removed from the outlet of North Twin Lake. Additionally, 25' of eroded bank on either side of the channel will be armored with riprap. Details of the project are contained in information and plans received at the Division of Water on October 18, 2002.

Location : Beginning approximately 300' upstream of the County Road 650 North crossing

at the outlet of North Twin Lake and continuing downstream to the inlet of South

Twin Lake

DOWNSTREAM: near Howe, Lima Township, LaGrange County SE¼, SW¼, SW¼, Section 23, T 38N, R 9E, Lagrange Quadrangle

Quad Code: 4108564

UTM Coordinates: Downstream 4620575 North, 627790 East

Application # : FW-22020

Stream : Brooks Creek

Applicant : Jay County Surveyor

Brad Daniels 120 Court Street

Jay County Courthouse Portland, IN 47336

Description : A new 250' long channel was constructed connecting the narrow end of a

horseshoe bend to bypass the horseshoe and a logiam that blocks the channel within the bend. The upstream 300' of the old channel bend was filled. Also, about 1500' of the west bank was cleared of trees, and the trees were stockpiled. Details of the project are contained in information and plans received at the Division of Water on August 12, 2002, September 4, 2002 and September 24,

2002.

Location : Approximately 1500' upstream of the County Road 74 South stream crossing

Application # : FW-22099

Stream : Grand Calumet River

Applicant : Elgin, Joliet & Eastern Railroad

Mark Paull, Project Manager

1141 Maple Road Joliet, IL 60432-1981

Description : The existing, deteriorated 10-span timber bridge carrying the Elgin Joliet and

Eastern Railrod over the river will be replaced with a new structure on essentially the same alignment. The new structure will be a 5-span concrete bridge with span lengths of 26', 26', 50' at center, 25' and 25'. The structure will have an out-to-out length of 152' and a clear roadway width of 15'. The spill through abutments will have 2:1 and 3:1 sideslopes armored with 1.1 cubic tons of riprap. The new approaches will not be elevated above the existing approaches. The existing structure will be completely removed. Details of the project are contained in information and plans received at the Division of Water on September 30, 2002

and October 24, 2002.

Location : At the Elgin Joliet and Eastern Railroad river crossing

near Gary, Calumet Township, Lake County

Application # : FW-22114

Stream : West Fork White River

Applicant : City of Indianapolis

Bob Masbaum

Department of Public Works 604 North Sherman Drive Indianapolis, IN 46201-2563

Description : A 290' x 107', three-million gallon underground storage tank will be constructed

on the north (left) bank to collect combined sewer overflows. Construction activities within the floodway will consist of: an approximately 1150' long, 12' wide gravel access drive will be constructed; a temporary earth dam will be constructed across an existing channel; temporary riprap will be placed in the channels and removed following construction; an approximately 335' x 65' siltation pond will be constructed; approximately 1140' of temporary chain link fencing will be installed for construction purposes; approximately 18" of soil will be placed over the tank; the overbank will be graded in order to accomodate the proposed tank. Details of the project are contained in information and plans

received at the Division of Water on October 16, 2002.

Location : on the northeast bank, extending approximately 1500' to 1850' downstream

(south) of the West New York Street stream crossing

Application # : FW-22117

Stream : Halls Branch

Applicant : Indiana Department of Transportation

Carole Korbly Scott

100 North Senate Avenue, Room N642

Indianapolis, IN 46204-2216

Description : Approximately 500' of the stream's eroded east streambank will be stabilized by

removal of unstable soil types and replacement with new compacted soil reinforced with Geogrid material types B and C. The soil will be covered with riprap keyed into the toe of the slope over geotextile fabric to protect the bank from further erosion. The new work will conform to the existing bank at the project limits. Details of the project are contained in information and plans

received at the Division of Water on October 24, 2002.

Location : Approximately 2000 feet upstream of the confluence with Long Run and

extending northwest for 500'

Application # : FW-22119

Stream : Crooked Creek

Applicant : Johnson County Board of Commissioners

Joseph E DeHart, Chairman

86 West Court Street, Courthouse Annex

Franklin, IN 46131-2388

Description : The existing 14' x 0' x 8'-9" multi-plate pipe arch culvert carrying County Road

500 West over Crooked Creek was washed out during spring flood and required emergency replacement. The replacement structure is a twin 10' x 8' reinforced concrete box placed side by side and 56' in length. The concrete boxes are skewed 27 degrees left with upstream and downstream inverts of 754.68', NGVD and 754.12', NGVD respectively. Concrete headwalls and wingwalls were constructed on both the upstream and downstream ends of the concrete boxes. The limits of the channel work extended 50' upstream and 50' downstream. Riprap has been placed over geotextile or mulched seeding at both ends of the culvert for erosion control. Existing guardrail was removed and replaced. The new approach roads will be elevated 1.15' above the existing approaches. Right-of-way easements were obtained during the construction of the project. The existing culvert was removed. Details of the project are contained in

information and plans received at the Division of Water on October 25, 2002 and

October 29, 2002.

Lake : Messick Lake

Applicant : Indiana Department of Natural Resources

Division of Fish and Wildlife

Glen Salmon

402 West Washington Street, Room W273

Indianapolis, IN 46204-2781

Description : An existing concrete boat ramp will be replaced with a new 15' x 64' concrete

boat ramp along 15' of the applicant's 50' frontage. The new ramp will extend approximately 32' lakeward of the lake's legal shoreline. A 5' x 5' mooring area will be constructed adjacent to the north side of the ramp by placing a uniform 6" layer of pea gravel on the lakebed. A glacial stone seawall will be constructed across 11' of the applicant's frontage. Also an accessible transfer pad will be constructed across 12' of the applicant's frontage. The transfer pad will be armored with a steel seawall along it's lakeward side and capped with a layer of concrete. In addition, a 15' x 15' area will be dredged to remove approximately 15 cubic yards of material to allow for better access to the transfer pad. Details of the project are contained in information and plans received at the Division of

Water on October 11, 2002 and October 22, 2002.
